

Restaurants should cook all their food in a microwave

If you can't cook everything you make in a microwave that's a skill issue. You need to learn now because when everything is cooked in a microwave you'll be out of a job. When microwaves are everywhere you'll be so far behind you'll never learn how to use a microwave. Chefs who use tools besides microwaves are luddites. They live in fear of the future.

Generative AI Policy Questions

- What problems arise, if any, from a policy that allows unrestricted use of generative AI?
- What problems arise, if any, from a policy that bans all use of generative AI?
- How might these problems be mitigated through policy design?
- To design a better policy, what information, skills, or resources would be helpful?

Small groups

Groups 1, 3: Draft a generative AI policy for this class

Groups 2, 4: Draft a default generative AI policy for seminar classes

Group 5: Draft a default generative AI policy for doctrinal classes
